Dot Retrofit

Retrofit kit for Dot luminaires

Energy-saving, fast installation retrofit solution for upgrading original Dot luminaires to modern LED technology.

Besides reducing waste by re-engineering existing components, retrofitting luminaires with energy-efficient LEDs cuts greenhouse gas emissions and can also improve visibility, comfort, and light quality. Further benefits include lower maintenance requirements, longer lifespan and improved durability. Integrating intelligent lighting controls results in efficient usage management, further reducing energy consumption.

- 100,000 hour LED life expectancy
- Suitable for existing 28 W and 38 W, 452 mm diameter versions
- Significantly improved efficiency; power consumption more than halved compared with 38W 2D
- Easy to install
- Suitable for retrofit into existing standard, emergency and AutoTest Dot luminaire
