

# Projects .....

## **Whitehaven Sports Centre, Cumbria, United Kingdom**

The main sports hall is lit with Solow luminaires fitted with wire guards for impact protection.

Fifty, 400W and ten 250W Solows with metal halide lamps were installed at an 11 metre mounting height to provide an illumination level of 500 lux at floor level.

Broad distribution reflectors for optimum

photometric performance were used.

Special brackets, designed to accommodate a raising and lowering mechanism for re-lamping and general maintenance purposes were fitted to the back of the Solow mounting tray.

Solow luminaires with up to 80% Light Output Ratios allow maximum spacing, delivering a highly efficient performance.

..... *building on our experience*
