SmartScan 4G Gateway Retrofit

4G retrofit upgrade for Generation 1 Gateways

Upgrade your operations with the SmartScan 4G Gateway Retrofit, designed to seamlessly future-proof your system ahead of the UK's 2G and 3G network switch-off. By replacing legacy FTP connections with encrypted MQTTS over TLS, this drop-in upgrade significantly elevates your cyber security, guarantees data integrity, and unlocks rapid remote-control performance with near-instant system feedback and command execution.

Best of all, deployment is entirely stress-free: the retrofit preserves all historical customer data and requires zero onsite recommissioning, ensuring minimal site disruption while keeping your business safely connected to modern UK networks.

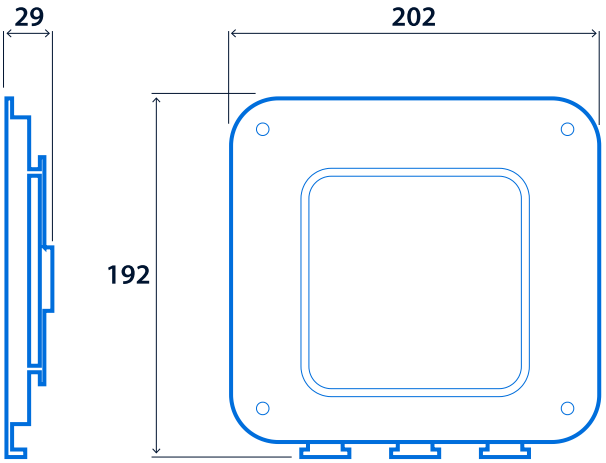

- Future-ready connectivity, 4G communication, ensuring long-term compatibility
- Enhanced security & reliability, secure MQTTS over TLS encryption
- Faster remote-control for quicker command execution and system feedback
- Seamless upgrade process, no loss of customer data during upgrade
- No recommissioning required, minimising site disruption
- Replaces existing front panel, simple to install
