High Dependency Linear

Recessed luminaires for high-dependency/intensive care ward areas

Designed for life-crucial hospital applications, the High-Dependency Linear is a recessed luminaire with a steel body and an aluminium frame.

The High-Dependency Linear has been designed with an ultra-low-glare V-blade louvre set behind a clear polycarbonate cover. The asymmetrical distribution of this cover directs light towards the patient's bed. An outstanding Colour Rendering Index (CRI) rating of 90+ ensures clearer, more accurate colours for patient inspections.

Applications: high-dependency/intensive care hospital wards.

- Asymmetrical distribution directs light towards bed
- Ultra low glare V-blade louvre set behind a clear polycarbonate cover
- Snap fix screw-less frame
